Dur- und Moll-Tonarten.

Es giebt zwei Tongeschlechter, welche Dur- und Moll— genannt werden. Man erkennt sie zunächst an ihrer Terz, welche bei einer Dur-Tonart **gross**, dagegen bei einer Moll-Tonart **klein** sein muss. Der Unterschied zwischen einer grossen und kleinen Terz besteht darin, dass zwischen der grossen Terz **3** halbe Töne und zwischen der kleinen Terz nur **2** halbe Töne liegen. Zum Beispiel:

Ferner wird bei den Dur-Tonarten nur die Vorzeichnung berücksichtigt, während bei den Moll-Tonarten die **6.** und **7.** Stufe aufwärtsgehend erhöht werden muss. Z. B.

Major and Minor-Keys.

Two different kinds of keys exist, which are called Major and Minor. One recognizes them firstly by their thirds, which are larger in major, and smaller in minor. The difference between a major and minor third consists of one semi-tone; the semi-tones lying between a major third are three in number, between a minor however only two. For instance:

In major- keys one considers only the signature, but in minor- keys the sixth and seventh degree has to be raised ascending. For instance:

Nº 12.

The musical score for No. 12 consists of three staves. The first staff begins with a treble clef, a key signature of one sharp (F#), and a 3/4 time signature. It contains a series of eighth and sixteenth notes, some beamed together, and rests. The second staff continues the melody with similar note values and includes some triplet-like groupings. The third staff concludes the piece with a final cadence, marked by a double bar line and repeat dots.

Die Doppelzunge.

Man hat auf der Flöte zweierlei Zungenstoss-Arten, nämlich den einfachen Stoss und den Doppelzungen-Stoss. Ersterer entsteht dadurch, dass man in die Flöte spricht: ta ta ta, wodurch, so oft die Zunge von hinten nach vorne geht, stets nur ein Stoss entsteht. Hält man aber einen Ton aus und spricht dabei in die Flöte: di-ke. di-ke, so wird ein Abstoss mit der Zunge nach vorwärts und ein zweiter Abstoss nach rückwärts entstehen. Diese Doppelzungen-Stossart gewährt eine grosse Ausdauer in den schnellsten Passagen, während beim einfachen Stoss die Zunge bald ermüdet. Man übe im Anfang die Doppelzunge sehr langsam und spreche die beiden Sylben dike sehr deutlich aus.

The Double-Tongue.

Two kinds of tongue-strokes exist on the Flute, the single tongue-stroke and the double tongue-stroke. The former is produced by speaking into the flute the words: tah, tah, tah, by doing this, only one stroke is originated, whenever the tongue moves from the back to the front. If one sustains a tone however, and speaks at the same time into the flute: de-kay, de-kay, a repulsion of the tongue to the front, and a second to the back will be issued. This kind of double tongued-stroke offers a great power of endurance even in the most rapid passages, whereas the tongue soon gets tired with the single stroke. One should practise the double-stroke at first very slowly and pronounce the two syllables „De-kay“ very distinctly.

The musical exercises are arranged in nine staves, each with a treble clef and a common time signature (C). The exercises progress from simple to more complex rhythmic patterns, including eighth and sixteenth notes, and various key signatures (C major, D major, E major, F major, G major, A major, B major, C minor, D minor, E minor, F minor, G minor, A minor, B minor, C major).
